Hard Drive

- Full name: Hard Disk Drive

- Occupation: permanently stores all information saved to the computer, then retrieves it later when it is needed.

- Favorite hobbies: Reading and writing. A lot.

SSD

- Full name: Solid State Drive
- Skills: Also permanently stores data, but without clunky moving parts. This makes it much faster than a hard drive.
- Favorite Olympic sport: Sprinting

RAM

- Full name: Random Access Memory

- When you open a program, it gets loaded from the hard drive into the RAM. RAM is much faster than the hard drive, so this allows your computer to run smoothly. Only temporary things access RAM; anything that is saved permanently is sent back to the hard drive.

- Favorite activity: Juggling

Optical Drive

- Other names: CD Drive
- Skills: Loading information from CDs, DVDs, and Blu-Rays, or writing information back onto them
- Favorite artist: Taylor Swift
